Jokers and Marbles paddle template

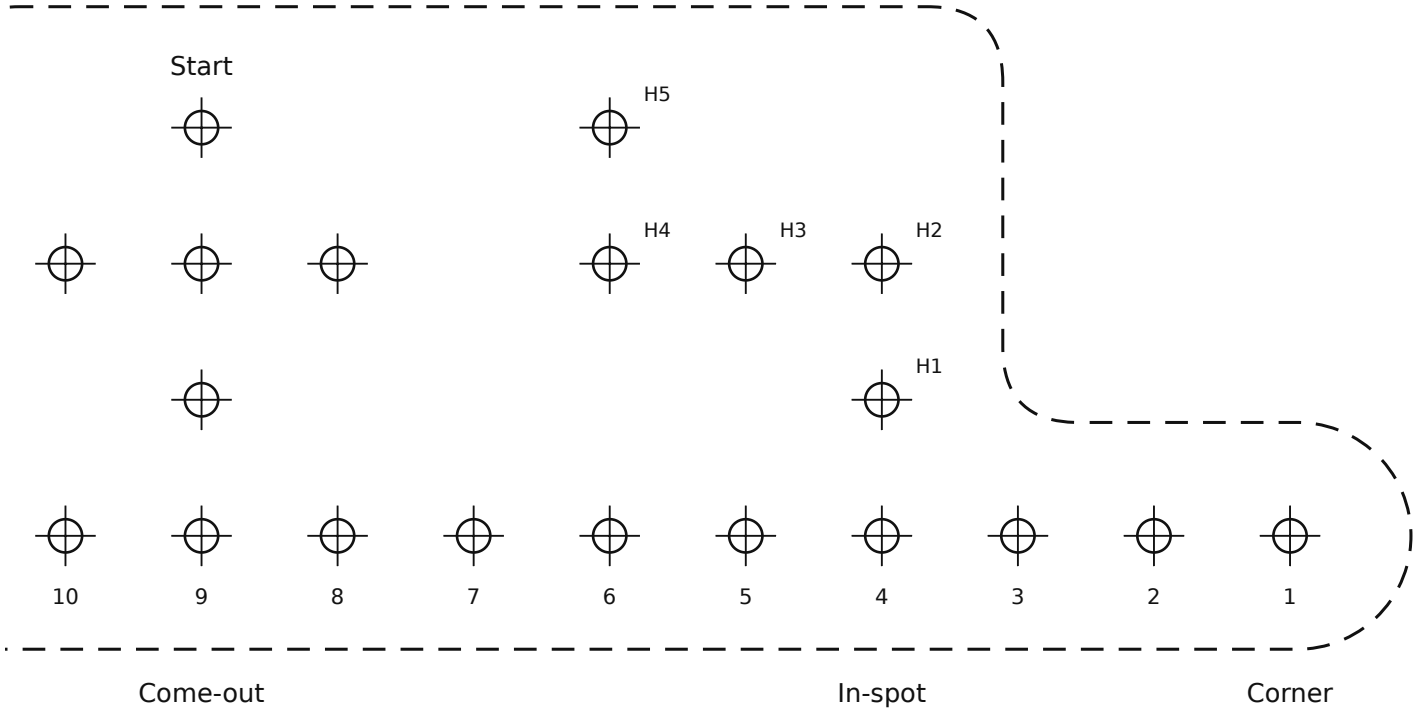

One paddle, drawn at true size from the Got Jokers board: 18 mm between hole centres, 18 track holes, 5 start holes and 5 home holes. Make one paddle per player.

1. Print pages 2 and 3 at 100% (Actual size). Do not use Fit to page.
2. Measure the 100 mm scale bar on each page. If it is off, fix the print scale and print again.
3. Trim one sheet and line up track hole 10 on both sheets, then tape them together.
4. Tape the template to the wood and mark every hole centre with an awl.
5. The dashed line is a suggested outline. Shape the ends to suit the joint you use.

Hole 1 is the corner hole. The in-spot is hole 4 and the come-out hole is hole 9, right in front of the start area. The dotted circle past hole 18 is the next paddle's corner hole.

Page 2: corner end (holes 1 to 10)

100 mm: measure this to check the print scale

Page 3: far end (holes 10 to 18)
